PROFESSIONAL SUMMARY

Software Engineer with 1+ year of experience building Java applications using Spring Boot, Microservices, and React.js. Experienced in modernizing enterprise applications using Domain-Driven Design (DDD) and developing Generative AI & Agentic AI solutions with Spring AI, LangChain, and LLM integrations. Strong background in building REST APIs, secure distributed systems, and cloud-native applications using Agile development practices.

TECHNICAL SKILLS

Languages: Java, SQL, Python, C++

Frameworks & Libraries: Spring Boot, Spring Security, Spring Cloud, Spring AI, Hibernate, JUnit 5, React.js

AI & GenAI: Spring AI, LangChain, LLM Integration, Agentic AI, Prompt Engineering, RAG

Databases & Messaging: MySQL, PostgreSQL, Apache Kafka, RabbitMQ

Cloud & DevOps: Docker, AWS (EC2, ECS, Lambda, S3, IAM), Git, GitHub

API Management: RESTful APIs, Swagger (OpenAPI), Postman

Observability & Monitoring: OpenTelemetry, Structured Logging & Metrics, Prometheus, Grafana, LangFuse

Security: OAuth 2.0, JWT, Keycloak

Development Practices: Agile Methodologies, Code Reviews, Debugging, Unit Testing

PROFESSIONAL EXPERIENCE

Software Engineer Intern

Capgemini Technology Services India Limited, Bangalore

April 2025 – June 2025

Quiz Application

- Designed and developed a Quiz Application using a microservices architecture by splitting the system into Authentication, Question, Quiz, Leaderboard, and Payment services.
- Implemented secure REST APIs using Spring Boot, Spring Security, API Gateway, and Netflix Eureka, enabling centralized routing and service discovery.
- Built quiz and question management modules with complete CRUD functionality, integrated a real-time leaderboard, and added payment support for premium quiz access.
- Applied Spring AOP for cross-cutting concerns and developed a responsive frontend using HTML and CSS.

Tech Stack: Java | Spring Boot | Spring Security | Spring Cloud | API Gateway | Netflix Eureka | Spring AOP | MySQL | HTML | CSS

Software Engineer

Capgemini Private Limited, Pune

July 2025 – Present

Legacy Application Modernization using Domain-Driven Design (DDD)

- Contributed to modernizing legacy applications into Java-based applications by applying Domain-Driven Design (DDD) principles, including bounded contexts, aggregates, entities, value objects, and domain services.
- Refactored tightly coupled legacy modules into modular services, improving maintainability, scalability, and code quality. Applied strategic DDD patterns such as context mapping and anti-corruption layers to facilitate integration between modernized modules and existing legacy systems.
- Collaborated with cross-functional teams including business analysts, product owners, UI/UX designers, and QA engineers to deliver production features in Agile sprints.
- Performed code reviews, debugging, unit testing, and defect resolution to maintain high software quality.

Generative AI & Agentic AI Development

- Built AI-powered features using Spring AI, LangChain, and LLM integrations, including document summarization, question answering, and chatbot functionality.
- Built Agentic AI workflows with tool-calling capabilities, enabling AI agents to interact with external APIs, databases, and external services through Model Context Protocol (MCP).
- Designed evaluation and observability workflows using LangFuse, structured logging, and tracing to monitor response quality, tool usage, and task completion accuracy.

- Integrated AI capabilities into existing Spring Boot microservices and exposed them through RESTful APIs documented with Swagger.

SELECTED PERSONAL PROJECTS

Bank Application (Microservices)

January 2026-April 2026

- Architected 3 independent Microservices (Accounts, Loans, Cards) with centralized configuration management using Spring Cloud Config Server, reducing configuration drift across environments.
- Implemented service discovery using Eureka Server and API Gateway for routing, authentication, and cross-cutting concerns with AOP.
- Integrated RabbitMQ and Kafka for event-driven communication and containerized all services with Docker and Docker Compose for consistent and streamlined deployments.
- Applied circuit-breaker resilience patterns for fault tolerance and configured Prometheus and Grafana observability dashboards monitoring service health metrics in real time.
- Secured inter-service communication using OAuth2 with JWT and Keycloak, implementing role-based access control across all 3 microservices.
- Documented 20+ RESTful APIs using Swagger (OpenAPI) and validated all endpoints with Postman, achieving full API test coverage.

Tech Stack: Java | Spring Boot | Microservices | Spring Security | MySQL | Spring Cloud | Docker | Kafka | RabbitMQ | Prometheus | Grafana | JWT | OAuth2

E-Commerce Book Application

September 2025 – December 2025

- Built a full-stack Book Application using Java, Spring Boot, React.js, and MySQL with JWT-secured Microservices; integrated Razorpay for secure real-time payment processing and transaction management.
- Integrated MySQL for transactional data management and Cloudinary for storing and delivering book thumbnails, enabling efficient media handling and seamless content delivery.
- Designed efficient REST APIs and optimized database queries for reliable data retrieval and application performance.
- Developed role-specific dashboards with admin CRUD operations, ensuring controlled content management across 3 distinct user roles.
- Integrated an AI-powered chatbot using Spring AI, automating support responses and increasing user engagement.
- Documented 15+ RESTful APIs using Swagger; performed code reviews and delivered features in Agile sprints in collaboration with UI/UX and QA teams.

Tech Stack: Java | Spring Boot | Microservices | Spring Security | MySQL | Cloudinary | Spring AI | React.js | Razorpay

CERTIFICATIONS

AWS Certified Cloud Practitioner (CLF-C02)

December 2025

ACHIEVEMENTS

- 5 Star HackerRank in SQL.
- Secured AIR 1519 in GATE 2023 — Scored 357 in GATE MA (Mathematics) with an All India Rank of 1519.

EDUCATION

Lovely Professional University

Master of Computer Applications (MCA) — CGPA: 8/10

Jalandhar, Punjab

Aug 2023 – June 2025

Paliwal P.G. College

Bachelor of Science (Computer Science)

Shikohabad, Uttar Pradesh

Aug 2020 – May 2023

Young Scholars Academy

12th with PCM

Shikohabad, Uttar Pradesh

2018 – 2019
